

CAREER SERVICE REQUIREMENTS

ORR - D/GP - Industrial Branch Chief

1. OBJECTIVES:

Functioning under the Division's general mission to produce photographic intelligence support and training in the utilization of photographic information within CIA, the Chief of the Industrial Branch is responsible for developing research data of broadest scope covering physical intelligence aspects of the constructions and operations of man on the earth's surface as observed in or interpretable from the latest available photography. Those of major importance include urban studies and industrial analysis consisting of photographic location, description, dimensioning, identification, of major component parts, identification of major supporting facilities (power, railroads, etc.) and/or estimates of capacity for expansion. The technical data derived supports the fields of geographic and economic intelligence in the broadest sense of their CIA objective.

Generally photographic intelligence activities supervised by the Branch Chief are typical of professional intelligence research and include the assembly, analysis, evaluation, collation, synthesis and presentation of technical data supporting the fields of geographic, economic, scientific, current and covert intelligence. The Branch Chief is responsible for the correctness and validity of the substantive content of all data or service supplied by his branch and is concerned with details as well as the broadest scope

of application of photography, photographic interpretation, photogrammetry, photographic intelligence reconnaissance matters, and related "intelligence systems" as they apply to his responsibilities.

2. TRAINING AND EXPERIENCE REQUIREMENTS

The general types of training and other experience accomplishments required to achieve an estimated maximum performance capability are listed as follows:

a. Training in management and administration of the order offered in the CIA Basic Management Course and the Reading Improvement Course.

b. Language training, as necessary, in Russian, German and one or more Romance languages to develop a capability sufficient to use maps and charts in these languages and to identify the nature of the content of documents and publications.

c. University training, as necessary, in photogrammetry, photogeography and regional geographic studies.

d. Area training and travel overseas with emphasis on industrial centers and installations.

e. Attendance at the Industrial War College and training in military schools, colleges, and agencies, including courses in strategic intelligence, escape and evasion, radar reconnaissance systems and interpretation, special weapons orientation, and others dealing with aspects of reconnaissance and photo intelligence systems.

f. Intimate knowledge and personal experience through collaboration with components of the DD/I area down to branch level, and experience in handling DD/F problems.

g. Experience in Area, Office, Agency and Inter-Agency committees with emphasis on Department of Defense agencies.

h. Working acquaintance with the Department of Defense Photo Intelligence and related centers overseas and within the continental limits of the U. S.
